ABOUT ME

Motivated Computer Science Engineering student specializing in AI/ML at Parul University. Proficient in Full Stack Development (MERN) and Python automation. Experienced in building practical solutions through hackathons, including browser extensions and AI-driven web applications, seeking to leverage strong skills in Data Structures, Algorithms, and OOP to contribute to innovative software engineering roles.

SKILLS

- Languages: Python, Java (OOP), JavaScript, SQL. AI/ML & Automation: Scikit-learn, Pandas, NumPy, NLP, Selenium, BeautifulSoup
 - Web Development: MERN Stack (MongoDB, Express, React, Node.js), HTML/CSS, REST APIs
 - Developer Tools: Git, GitHub, VS Code, Postman, JIRA, Antigravity, Docker, Kubernetes
-

WORK EXPERIENCE

AI/ML Engineer Intern Infosys | October 2025 - December 2025

- Developed & Optimized ML Models: Collaborated with the engineering team to build and fine-tune machine learning models using Python and Scikit-learn, improving prediction accuracy by 90% for internal automation tools.
 - Web-Based AI Deployment: Assisted in integrating trained AI models into web applications using REST APIs, leveraging understanding of Full Stack (MERN) architecture to ensure smooth frontend-backend communication.
 - Documentation & Reporting: Documented model performance metrics and testing procedures, ensuring clear communication of technical results to non-technical stakeholders.
-

PROJECTS

Web Scan Pro

October 2025 - December 2025

- Developed Web Scan Pro, a dynamic web vulnerability scanning tool that detects common security flaws like XSS and SQL injection in web applications.
- Demonstrates proficiency in Python scripting, automation with Nmap/OWASP ZAP, full-stack integration for real-time reporting, and GitHub deployment with clean code structure.

Resume Sync

October 2025 - December 2025

- Developed a browser extension using JavaScript to streamline the job application process, enabling intelligent parsing and autofilling of resume data into external job portals.
 - Engineered DOM manipulation scripts to accurately identify and map dynamic HTML form fields, reducing manual data entry time by over 40% for users.
-

CERTIFICATIONS

- Artificial Intelligence – Infosys Springboard
 - Python for Data Science, AI & Development – IBM
 - IT Specialist: JavaScript – Pearson
-

EDUCATION

Parul University

CGPA: 8.47
